CAREER SUMMARY

Data Engineer with 5 years of experience designing, developing, and optimizing scalable data pipelines and ETL/ELT solutions across Finance, CPG, Retail, Logistics, and Media & Entertainment domains. Experienced in PySpark, SQL, Azure Databricks, Hive, Snowflake, BigQuery, and Azure Data Factory. Proven track record of leading client engagements, delivering end-to-end data engineering solutions, automating workflows, and improving operational efficiency for global organizations including Citi Bank, Google, Unilever, P&G, Mars, and Mondelez.

TECHNICAL SKILLS

Cloud Technologies	Microsoft Azure, Microsoft Azure Data Factory, Databricks
Databases	Hive, MySQL, Snowflake, BigQuery, Microsoft SQL Server Management Studio
Technical Skills	Python, Pyspark, SQL, HQL, Linux, Hadoop
Other Tools	Anaconda, Tectia, Bitbucket, Github
Version Control	Github, Bitbucket, Jira
Data Engineering	ELT/ETL, Data Warehousing, Data Migration, Data Quality

PROFESSIONAL EXPERIENCE

FRACTAL ANALYTICS | Data Engineer | July 2022 – Present

Worked as a Data Engineer for an International US based Bank – **Citi Bank**, some reputed CPG companies (Unilever, P&G, Mars, **Mondelez**) and the most used search Engine - **Google**. Delivered data engineering solutions across Finance, CPG and Media & Entertainment domains and worked in creating end to end Data Pipelines, ingesting and processing data from various sources.

- Built end-to-end data pipelines for a global US-based bank and leading CPG companies, ingesting and processing data from diverse sources using **Python (Pandas, NumPy), PySpark, Hive**, and **SQL**.
- Developed scalable PySpark pipelines to read from Hive tables, CSVs, and other sources, transform data, and deliver outputs to **Hive, Parquet, and CSV** targets, supporting reporting and analytics.
- Automated pipeline execution using **Shell scripting**, implemented data quality checks, ensured production readiness, and conducted end-to-end pipeline testing.
- Created and optimized **HiveQL** and **SQL** scripts for data processing, table creation, and workflow improvements to reduce processing lead time.
- Worked on **Lift-and-Shift** migration projects, enhancing performance and reliability of existing data jobs.
- Automated Databricks workflow reconciliation and validation processes, reducing manual effort by approximately **2 hours** per day and improving operational efficiency.
- Supported production workloads with **99%+ SLA** adherence through proactive monitoring and issue resolution.
- Led client-facing project discussions and requirement workshops, successfully delivering multiple projects with minimal supervision and maintaining a **100% on-time delivery** record.
- Independently managed multiple projects end-to-end, acting as the primary point of contact for clients and driving all **client interactions**, requirement gathering sessions, status updates, issue resolution, and solution discussions.
- Led project discussions with business and technical teams, translating business requirements into scalable data engineering solutions while ensuring **timely delivery** and client satisfaction.
- Collaborated with cross-functional stakeholders for requirement gathering, use-case development, workflow design, and client presentations.
- Participated in creating and reviewing **Solution Design Documents (SDD), High-Level Design (HLD), and Low-Level Design (LLD)** for data engineering solutions.

INFOSYS | System Engineer | Jan 2021 – June 2022

Worked as a Data Validation Engineer for a US based Global Clothing brand on a **data migration** project for migrating workloads running on Google Cloud Platform (**GCP**) to Azure platform and to migrate in scope Tableau reports to MicroStrategy on Azure platform and perform ETL validations along with building report and metric testing on MicroStrategy.

- Developed and executed complex SQL validation queries to ensure accuracy of data migrated from GCP to Azure.
- **ETL/Data Warehouse** backend testing and BI Report testing
- Knowledge in preparation of **Test cases**, Test Scenarios and Defect Management to ensure Quality Assurance
- Experience in preparing Test Reports, documentation and in Project Management tools like **JIRA**
- Collaborated with business stakeholders and client teams to validate migration requirements and ensure successful project delivery.
- To validate data transfer from GCP to Azure for **history/incremental** load, cleansing rules in cleansed layer, data transformation for reporting dashboards in curated layer, Tableau dashboards with MicroStrategy reports built on top of semantic layer. Automating manual tasks for faster execution
